Evidence-gated architecture for a falsifiable digital twin

L0	**Frozen baseline**	Default path byte-identical. 86-batch regression anchor; max|delta| = 0.00e+00	final_validation_v2.json
L1	**Opt-in candidates**	V1 innovation test; V2 variance injection; V3 dual lookup. All disabled by default.	fully bypassable
L2	**Evidence gate**	Zero-info controls; two-sided criteria; LOO thresholds; A/B confusion table	18/20 NO_GO
L3	**Human promotion**	Default-path switch requires explicit human confirmation	NOT EXECUTED

PROMOTION BLOCKED

Governance spine: versioned contract v1.0-v1.97 | debt ledger D-2…D-92 | sign-off R-1…R-17 | gate + final check + idempotent sync

Invariant: a candidate may be evaluated, but never silently promoted; every rejection and every negative result is retained as evidence.
